Zyflamend Promotes Whole-Body Health*

The #1-Selling Herbal in the U.S.‡ for Healthy Inflammation Response*

Many people think that only joints are affected by inflammation. The truth is the body’s natural inflammation response affects everyone and every major organ system.

Given the link between a healthy inflammation response and whole-body health – a source of extensive and ongoing research – a supplement strategy geared toward promoting a healthy inflammation response is as fundamental as a daily multivitamin.*

Multiple Synergistic Components, Whole-Body Benefits

Health experts agree that a daily multivitamin containing the full spectrum of required vitamins and minerals provides an important “insurance policy” against nutrient deficiencies and the metabolic imbalances associated with them.

Extensive research conducted within the last two decades has indicated that phytochemicals present in herbs and spices can safely and effectively promote a healthy inflammation response.*

Combining an herbal protocol with a multivitamin offers the optimal broad-spectrum approach to nutritional and natural inflammation support.*

Research at leading medical institutions, including human clinical trials, has demonstrated a unique herbal formulation’s ability to promote a safe, natural, and healthy response to inflammation.*

Zyflamend® contains combinations of herbs traditionally used to promote a healthy inflammation response.* These herbs – most of which have been part of the human diet for thousands of years – are uniquely extracted to deliver the full spectrum of naturally occurring constituents.

Containing hundreds of bioactive constituents from ten of the most researched botanicals that promote a healthy inflammation response, Zyflamend provides multiple health benefits, including healthy aging, joint health, heart health, and bone health.*

Zyflamend for Healthy Aging

Aging is not the simple result of the passage of time. According to a provocative new view, it is actually something our own bodies create, a side effect of the essential inflammatory system. Resveratrol, a natural constituent commonly linked to red wine, is a powerful antioxidant. One serving of Zyflamend contains resveratrol equal to six glasses of wine!

Zyflamend for Joint Health

Modulation of the inflammatory process is an important and useful strategy for maintaining healthy joint function.* A healthy inflammatory response may also contribute to a control of bone changes that can cause discomfort and compromise the integrity of the joint.

Zyflamend for Heart Health

Recent research suggests that a factor in predicting heart health is gauging the amount of inflammation in the arteries. Maintaining a healthy cardiovascular system is strongly linked to a healthy inflammation response – Zyflamend is a compelling choice for promoting heart health.*

Zyflamend for Bone Health

Emerging evidence suggests that inflammation exerts a significant effect on bone metabolism by stimulating production of RANKL (Receptor Activator for Nuclear Factor κ B Ligand), a molecule that activates osteoclasts, the cells responsible for the breakdown of bone.
