Probiotic Product Guide
Product Quality

- Delayed Release Veggie Capsules (Helps Protect Probiotics From Stomach Acid)
- Contains No: Wheat, Eggs, Yeast, Soy, Sugar, Salt, Animal Derivatives, Maltodextrin, Magnesium Stearate, Artificial Flavors or Preservatives
- Gluten Free, Non-Dairy & Non-GMO
- Two Year Shelf Life At Room Temperature
- Bottled in Desiccant lined moisture absorbing Activ-Polymer™ Bottles
- Helps Maintain Healthy Digestion*
- Symbiotic effect by combining Prebiotics (FOS & Sunfiber®) with Probiotics
- Value Priced With 60 Servings, 2 Month’s Supply In Every Bottle

Product Enhancements

Sunfiber® (Partially Hydrolyzed Guar Gum)

- Sunfiber® promotes intestinal and colon health, and aids in the transit of food through the intestines.*
- Sunfiber® helps the body combat increased blood glucose levels by controlling the glycemic index of foods.*
- Sunfiber® is tasteless, colorless, odorless, gluten free, and readily dissolves in water.
- Sunfiber® alleviates constipation without overly degrading stool firmness, and provides regularly with healthy consistency.*
- Sunfiber® promotes the absorption of essential minerals such as magnesium and calcium, ensuring the human body receives the maximum benefits from digestible foods.*

Activ-Polymer™ Bottle

The engineered Desiccant Sleeve has controlled moisture absorption due to the desiccant sleeve surrounding the product. Using the impenetrable desiccant sleeve, the product in the bottle sees virtually no moisture.

Moisture Resistance Technology

Probiotic Health Benefits:

Probiotics are believed to protect us in two ways.

The first is the role that they play in our digestive tract. We know that our digestive tract needs a healthy balance between the good and bad bacteria, so what gets in the way of this? It looks like our lifestyle is both the problem and the solution. Poor food choices, emotional stress, lack of sleep, antibiotic overuse, other drugs, and environmental influences can all shift the balance in favor of the bad bacteria.*

When the digestive tract is healthy, it filters out and eliminates things that can damage it, such as harmful bacteria, toxins, chemicals, and other waste products. On the flip side, the digestive tract takes in the things that our body needs (nutrients from food and water) and absorbs and helps deliver them to the cells where they are needed. * (Source: OnHealth.com)

The other way that probiotics help is the impact that they have on our immune system. Some believe that this role is the most important. Our immune system is our protection against germs. * (Source: OnHealth.com)

How to Choose a Good Probiotic

Look for probiotics that use tested and proven strains.

Look for a product which comes in a moisture resistant air tight bottle like the Activ-Polymer™ Bottle to enhance stability of the probiotics.

Look for a delayed release veggie capsule to make sure the probiotics can be delivered through the stomach acid and reach the intestines without compromising the live count of the probiotics.

Look for a cGMP compliant manufacturer.

Look for an adequate CFU per serving and a company which uses third party testing to verify CFU count in the product. Five billion CFU per daily serving is usually adequate for a healthy person.
